Q1. Which of the following describe your musical activity? (Select all that apply)

Performer (instrumentalist / vocalist)

Composer or arranger

Improviser

Producer

Sound engineer

Educator

Ensemble Leader

Q2. Before using the Hi-Audio platform, did you use any other browser-based audio recording tools?

No

Q3. What platforms similar to Hi-Audio (for recording, collaborating and sharing multi-track compositions online) do you know?

Tool name

<https://www.soundjack.eu/> (works in the browser, with additional software that needs to be installed. Previously did not have 'recording' capability but latest version does, so I will try that out)

<https://www.sonobus.net/> (works as a standalone application or DAW plug-in. It focuses on connecting performers over a network, even if it is not 'built in the browser')

Q4. Which DAWs, apps, or equivalent software for making music do you normally use?

Software/Tool name

Bitwig

Digital Performer

Playsound.space (web based platform)

Q5. Do you usually record audio using an external audio interface (e.g. a sound card connected to a microphone or instrument)?

Yes, sometimes

Q6. Which musical instruments do you play, and at what level?

Instrument

Level

Keyboard

Intermediate

Bass guitar

Expert/Professional

Saxophone

Intermediate

Guitar

Beginner

Q7. Which instruments or sounds did you record/upload to the Hi-Audio Radiophrenia 2026 Jam session?

Track content

I uploaded the very first track in the Hi-Audio Radiophrenia 2026 Jam session called "Nela_Brown_Paris_Place_de_la_Concorde_.Traffic_short_2025-11-18.wav". I recorded the track using the Sennheiser Ambeo In-Ear Smart Headset. The binaural recording is perceived as stereo when listened to via speakers or as immersive when listened to via headphones.

Q8. How did you add tracks to the Hi-Audio platform?

I uploaded tracks to Hi-Audio after recording them using my sound recorder

Q9. Did you measure latency using Hi-Audio's built-in method before you started recording?

Not applicable — I only uploaded files

Q11. How did you record/upload tracks to the Hi-Audio platform?

I recorded/uploaded all the tracks in one go

Q12. How long (approximately) did you spend using the Hi-Audio platform (e.g., recording, uploading, or managing tracks)?

Between 20 and 30 minutes

Q13. Which operating system did you use?

macOS

Q14. Which web browser did you use?

Firefox

Q15. Did you use wired headphones/earphones (with a cable) or wireless (e.g. Bluetooth)?

Wired

Q16. To what extent do you agree that the Hi-Audio platform meets the necessary standards as a professional audio recording application?

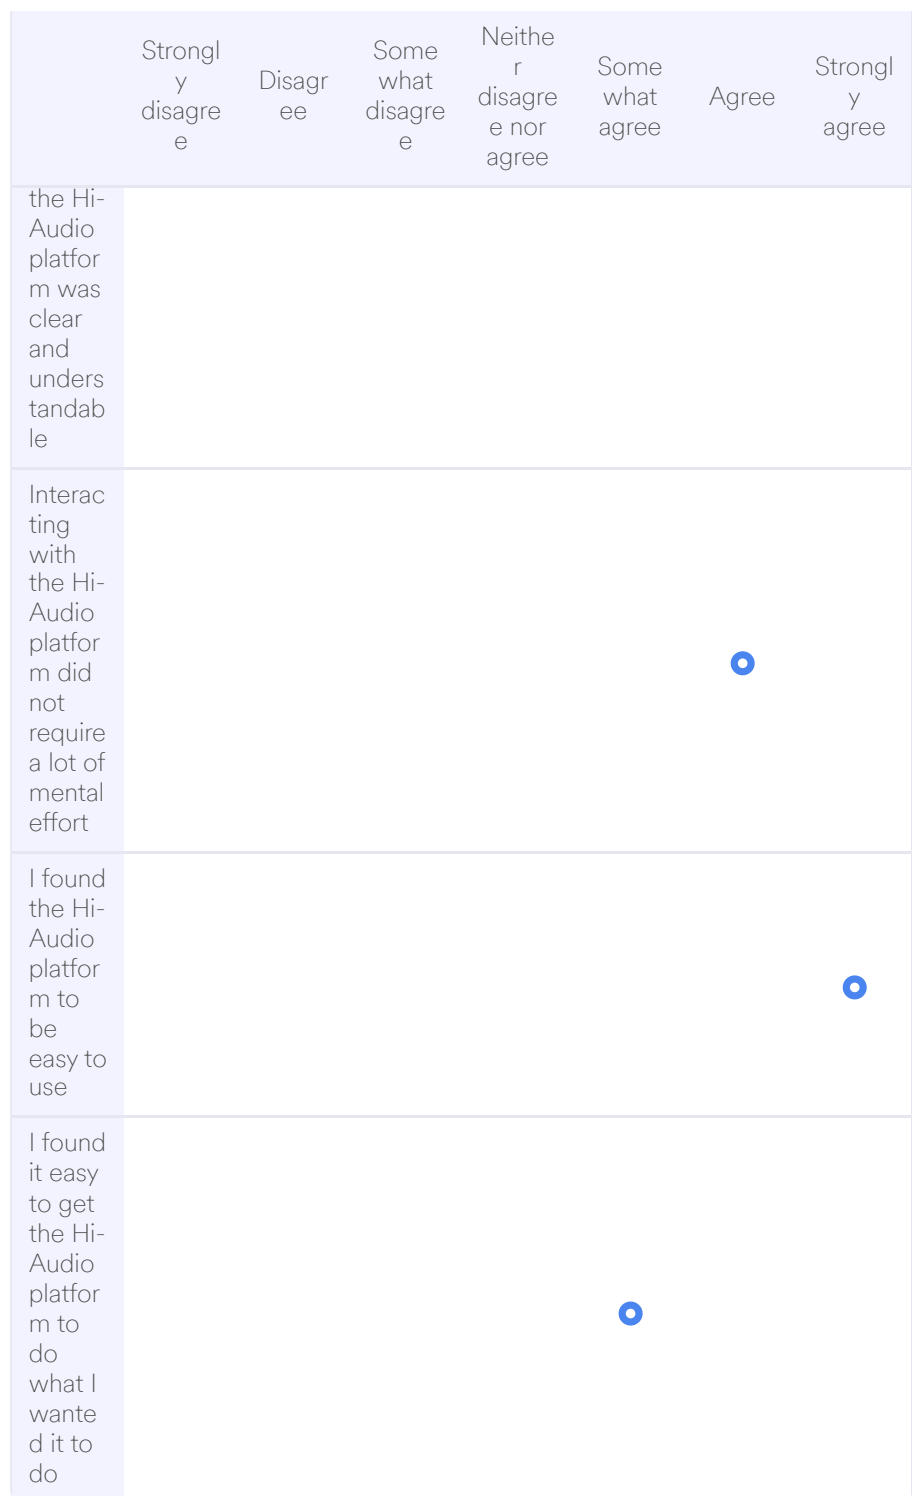

Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
					☒	

Q17. To what extent do you agree that the Hi-Audio platform facilitated your artistic intentions?

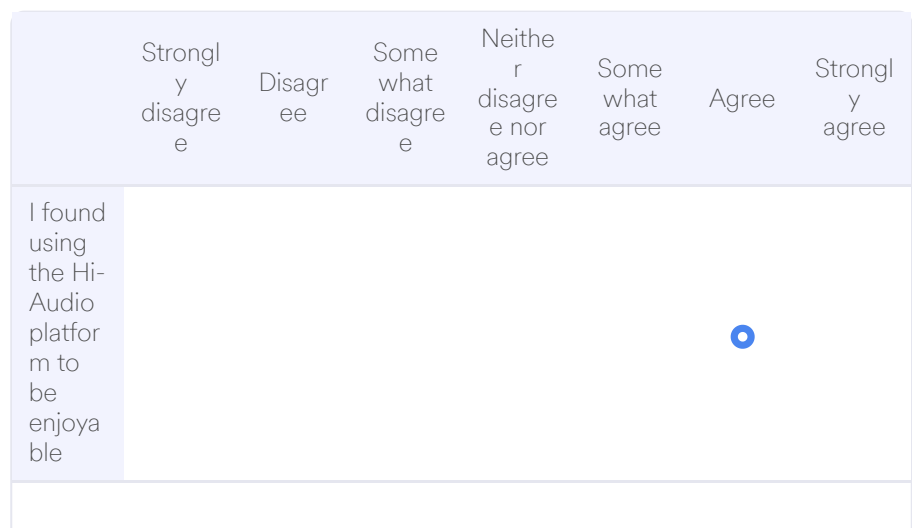

Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
						☒

Q18. To what extent do you agree with the following statements regarding your initial experience using the Hi-Audio platform?

Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
My interaction with						☒

Q19. To what extent do you agree with the following statements regarding your personal experience using the Hi-Audio platform?

	Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
The actual process of using the Hi-Audio platform was pleasant						☒	
I had fun using the Hi-Audio platform							☒

Q20.To what extent do you agree with the following statements regarding your potential future use of the Hi-Audio platform for audio recording?

	Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
Using the Hi-Audio platform for recording music would be a good idea							☒
I would find the Hi-Audio platform useful for recording music					☒		
I would plan to use the Hi-Audio platform in my					☒		

	Strongly disagree	Disagree	Some what disagree	Neither disagree nor agree	Some what agree	Agree	Strongly agree
next music project							
I would recommend the Hi-Audio platform to music colleagues							☒

Q21. What did you find most useful about the Hi-Audio platform?

The interface was very easy to understand. I did not need to read a manual or watch any videos to find the menus/functionality after a short onboarding process.

Q22. Did you encounter any challenges when using Hi-Audio? If so, please describe them

The 'transport bar' did not provide very clear feedback when buttons were pressed (i.e. buttons did not change colour), so it was difficult to see if something was happening or not (visually). Some of the icons in the interface were confusing. For example, hovering over the 'Headphone' icon shows text 'select cursor' which is confusing as it is very different to DAW. Clicking Mute and Solo buttons was also confusing. The empty track, being depicted with deep blue colour, looked more like some sort of error than the track being empty. Sometimes it took a long time for the track to be 'rendered', so I had to keep Firefox open until that was completed (whilst getting on with my other tasks).

Q23. Can you think of any other situation where Hi-Audio platform could be useful?

Hi-Audio platform would be very useful in remote music education. For example, imagine a child living in the French countryside and wanting to learn the saxophone. Issues: there are no music schools nearby; they are too young to go on the train by themselves, their parents can not drive them to the big city on a weekly basis. Now imagine that a music school in a big city (like Paris) has a curriculum that can be delivered online. For example, a teacher can record introductory videos about different types of saxophones and demonstrate a few things, like finger placements and embouchure. They can then record a simple scale, upload sheet music for the scale, and the child can play along with this recording to practice. When they think they have practised enough, they can record a track. The teacher will review it, give them feedback via video and give them the next exercise. Teachers could organise some in-person sessions with the student, but these would be complementary to the online session. Child and teacher could also review their progress by going back in time to review their historic sessions, and the child can always go back in time to review video lesson content. I understand this is a completely different view of how the platform could be used, and would involve changes to the platform, but it is worth thinking about.
